Valid Certification Exam Dumps Materials and Study Guide -  
Lead2Passed

**Exam :** 920-261

**Title :** Nortel Application Switch Rls.24.x  
Configuration and Admin

**Vendors :** Nortel

**Version :** DEMO

NO.1 After a Virtual Server Routers (VSR) has been created, which action can only be done by the master?

- A.host a telnet session
- B.respond to ARP requests
- C.keep track of available real servers
- D.process packets destined for the VIP

Answer:B

NO.2 Which is true when sharing is enabled for a Virtual Server Routers (VSR)?

- A.Client/server processing takes place on both switches.
- B.Server processing operates in round-robin mode between the switches.
- C.All client/server processing is forced to the master switch.
- D.Sessions are synchronized between both switches.

Answer:A

NO.3 Which of the following is a valid VRRP tracking parameter?

- A.Ports
- B.SNMP
- C.OSPF
- D.VRID

Answer:A

NO.4 Which two parameters must be configured the same on all switches for a given VIR?

- A.VRID and Priority for the VIR
- B.Priority and Interface IP address for the VIR
- C.IP address and VRID for the VIR
- D.VRID and Interface IP address for the VIR subnet

Answer:C

NO.5 What does a Virtual Server Router (VSR) provide redundancy for?

- A.VIR
- B.VIP
- C.NAT
- D.GSLB

Answer:B

NO.6 In order to create a BWM (Bandwidth Management) policy you must assign a policy number, specify

limits (reservation limit, soft limit, hard limit), and which of the following?

- A. Specify a buffer limit.
- B. Associate a new IP address with the necessary VLAN.
- C. Map IP addresses in a sufficient range.
- D. Create a table entry.

Answer: A

NO.7 To manage bandwidth, a bandwidth management contract is created. Which two parameters must the contract include? (Choose two.)

- A. blocking guidelines for unexpected or unwanted users
- B. a classification policy where frames are grouped together
- C. a key that allows for emergency expansion of bandwidth limits
- D. a policy that specifies a set of bandwidth usage limitations to apply to the frames

Answer: B D

NO.8 In which circumstance will a backup switch become the primary switch?

- A. when it ceases to receive advertisements from the primary switch
- B. after a successful bid to become the primary switch
- C. when forced via the /oper/vrrp/master command
- D. after receiving an advertisement with a lower preemption than its own

Answer: A

NO.9 Which three settings help you to determine whether or not you can apply a specific contract to the

Nortel Application Switch? (Choose three.)

- A. Bandwidth management is enabled.
- B. Healthchecks are monitoring traffic flow.
- C. A relevant classification is associated with that switch.
- D. The Application Switch is acting as a "core" Layer 2 device.
- E. The sum of all your CIRs does not exceed the bandwidth available.

Answer: A C E

NO.10 What is an advantage of a bandwidth management policy?

- A. It creates a health check on the available bandwidth.
- B. It creates a set of rules that determines the limits and packet precedence.
- C. It collects rules that assign the traffic specified to a certain port.
- D. It assigns the total amount of bandwidth that gets through the switch.

Answer:B
