Exam : HP0-J52

Title : Implementing HP SAN Infrastructure
and Solutions

Vendors : HP

Version : DEMO

NO.1 What is a feature of a B-series switch license upgrade?

- A. inter-switch link (ISL) trunking
- B. zero E-port capability
- C. advancedWebTools
- D. zoning

Answer: A

NO.2 A customer needs a scalable SAN infrastructure and wants to add ports when they are needed. Which

B-series switch offers license upgrades in 16-port increments?

- A. HP StorageWorks SAN Director 4/256
- B. HP StorageWorks 8/40 SAN Switch
- C. HP StorageWorks 8/80 SAN Switch
- D. HP StorageWorks DC04 SAN Director

Answer: C

NO.3 What is a benefit of connecting servers to the SAN one HBA at a time?

- A. It guarantees the connections are properly documented.
- B. It allows the switch time to balance the load.
- C. It prevents having to reboot the server.
- D. It allows verification that the HBA properly logs into the fabric.

Answer: D

NO.4 You are installing Cisco MDS switches into a SAN environment. Which command allows you to verify the status of all Fibre Channel interfaces?

- A. show ports brief
- B. switchshow
- C. list port allocation
- D. show interface brief

Answer: D

NO.5 During the installation of an HP StorageWorks SN6000 Fibre Channel Switch there is a fatal POST error.

How is this indicated by the switch?

- A. Fault light flashing red
- B. blinking LED and audible alarm
- C. audible alarm only

D. blinking heartbeat LED display

Answer: D

NO.6 When powering down the SAN, what is an exception that would change the power down sequence?

- A. The physical layout of the SAN devices is modified.
- B. A non-standard sequence is used for power on.
- C. A server is needed to run device management software.
- D. Data in the cache is previously flushed.

Answer: C

NO.7 A customer wants to implement a new c-Class blade environment and connect it as an edge device in

an existing fabric and Ethernet network. Which cost-effective converged network interconnect device

should you recommend to help reduce the resultant network sprawl by up to 95%?

- A. HP StorageWorks 4Gb SAN Switch for HP c-Class BladeSystem (Brocade 4024)
- B. HP StorageWorks 400 Multiprotocol Router
- C. HP Virtual Connect FlexFabric 10Gb/24-port Modules
- D. HP StorageWorks 4/32 SAN Switch with Access Gateway enabled

Answer: C

NO.8 What is the purpose of the DCFM Firmware Management checkbox labeled Overwrite current

firmware?

- A. allows a user to re-apply the same version of firmware
- B. write enables the NVRAM to allow firmware updates
- C. enables updates of both copies of firmware
- D. allows users to downgrade the version of firmware

Answer: A

NO.9 Which software utility can be installed by customers and used to perform SAN analysis and diagnostics

without supervision by an HP engineer?

- A. SAN Visibility
- B. SANXpert
- C. ScanMaster
- D. HPCC for SAN

Answer: A

NO.10 Which port type is used by building an LSAN on supported B-series 8Gb SAN Switches to provide the routed paths between routed fabrics?

A. VEX_Port

B. E_Port

C. EX_Port

D. TE_Port

Answer: C
